

Interview Summary

Capsizing of the Charter Fishing Vessel TAKI TOOO at Tillamook Bar On March 23, 2005

Witness: LT Felton Gilmore, USCG
Chief of Investigations Branch
Marine Safety Office Portland, Oregon

Date: April 13, 2005

Location: Telephone from NTSB office

Persons present: W. R. Woody, NTSB
R. Jones, NTSB

Statement in response to Questioning:

On April 6, 2005, We contacted LT Gilmore to inquire about obtaining the file at the Regional Exam Center on Captain Douglas R. Davis that could show what, if any, action had been taken by the Coast Guard about any of the conditions that Douglas R. Davis had reported on his (Forms 719) physical examination forms submitted to the Coast Guard for his license renewals. We explained that we were particularly interested in learning about any Coast Guard action or memos relating to the medication ***amitriptyline***, which Captain Douglas had been taking for insomnia. We mentioned that this medication had also been discovered during the autopsy conducted in Portland, Oregon following the capsizing of the *Taki-Too*. LT Gilmore reminded us that every thing in the Regional Examination Center files for Captain Davis R. Davis had been previously provided to the Safety Board.

On April 13, 2005, LT Gilmore called and reported to R. Jones that he had reviewed the file held by Regional Exam Center for Douglas R. Davis and that there was nothing in the file regarding any follow-up action on any of Captain Davis's physical examinations.
